TAG Announces Strategic Development Partnership with Sun Microsystems

Dulles, Virginia (September 23, 2002) – TAG® (Technology Advancement Group®, Inc.) today announced their official affiliation with Sun Microsystems as a Sun Developer Connections (SDC) Partner. The partnership will support TAG's long-standing commitment to developing innovative, rugged IT solutions with open standards, exceptional quality, and adherence to the most current Sun technology initiatives.

TAG will participate in the Sun Developer Hardware portion of the SDC Partner Program and will benefit from increased access to the most up-to-date technology from Sun, developer training, and technical support for developers. TAG's customers will profit from accelerated delivery of customer-engineered hardware systems; more cost-effective product solutions due to decreased product delivery and development costs; and reinforcement of TAG quality directives.

TAG has always been committed to being the leader in developing innovative, high quality Tactical Systems for all branches of the United States military. Our partnership with Sun will fortify this resolve and enable us to meet the evolving needs of our customers more fully than ever before, says TAG Vice President Marcus DeSouza.

The SDC Partner Program is the developer branch of Sun's iForce initiative, a customer-focused program designed to assist Sun customers in locating business solutions that meet their specific needs. The iForce program is a diverse network of partners, products, and solutions that enables partners to collaborate in developing solutions and customers to obtain these solutions more easily and cost-effectively.

Technology Advancement Group, Inc. (TAG) resolves our customers' IT challenges with world-class engineering, manufacturing and integration, and lifecycle management. TAG provides unmatched reliability for your C4ISR Systems through cost-effective turn-key solutions designed for any environment. For more information visit, www.tag.com or email at itarmor@tag.com.
