TAG Introduces Rugged Touch Screen LCD for Battlefield Use

New LCD Provides War Fighters Easier Access to Data

TechNet International, Washington, DC (May 6, 2003) – TAG announces the release of its new rugged tactical keyboard LCD drawer with touch screen capability to its line of deployable keyboard display drawers. The anti-glare, anti-reflective touch screen enables the war fighter to access critical data and applications in direct sunlight.

The RLKT-17T features an active-matrix 1280x1024 TFT LCD display, resistive touch screen interface, and intuitive on-screen menus for full display calibration. The unit also contains a rugged, waterproof 121-key keyboard with an integrated trackball mouse. The touch screen interface and the trackball mouse can be used interchangeably.

The RLKT-17T is compatible with all major operating systems and offers either serial or USB connections to the server or workstation. This product is a direct result of assessing our customers needs and delivering comprehensive solutions that meet those needs, commented Marcus DeSouza, Vice President. "The RLKT-17-T was custom-designed like every TAG product—with the end-user in mind," added DeSouza.

The unit will be unveiled at the AFCEA TechNet International Tradeshow May 6-8, 2003, at the Washington, DC Convention Center. TAG is currently taking orders for the RLKT-17-T. A 15" LCD version will be available later this year.

Technology Advancement Group, Inc. (TAG) resolves our customers' IT challenges with world-class engineering, manufacturing and integration, and lifecycle management. TAG provides unmatched reliability for your C4ISR Systems through cost-effective turn-key solutions designed for any environment. For more information visit, www.tag.com or email at itarmor@tag.com.
