Visit TAG® at Booth 1224 for the 2012 AFCEA West Defense and Technology Expo in San Diego

Technology Advancement Group® (TAG®) will be exhibiting at the largest state-of-the-art defense and technology exposition and conference on the West Coast at the San Diego Convention Center, January 24-26. The co-sponsored event hosted by AFCEA and the U.S. Naval Institute will feature exhibits from 400 technology leaders and discussions by leading military experts.

San Diego, California — January 23, 2012 —Technology Advancement Group® (TAG®) will be showcasing their latest rugged military GPS hardware and miniaturized systems at the AFCEA West Defense and Technology Exhibition, Booth 1224. TAG's Tactical Systems division will be on-hand to discuss how these innovative technologies benefit the war-fighter out in the field with applications such as UAV ground control stations, military surveying, machine control, video surveillance, maintenance operations and more.

Featured products will include the all new TC-200 TAG Commander™ rugged tablet that now includes an integrated military grade precision GPS receiver where sub-centimeter accuracy is achieved by using technology that provides sub-millimeter precision. Also on display will be the patent pending Field-Upgradable CPU™ technology found in TAG's line-up of Smart Displays and Small Form-Factor (SSF) Brick™ computers.

TAG's systems are designed to survive in the harshest environments around the world. Advanced engineering expertise in the design and deployment of these rugged systems enables TAG to support the U.S. Military's growing demand for robust mobile systems. This new breed of highly flexible and custom-built equipment is manufactured by TAG for use as Technology on the Move™. TAG's out-of-the-box thinking has led to a number of innovative patented technologies showcasing a strong commitment to Research & Development and unprecedented Customer Service with 24x7 access to the company's Chairman & Owner, Mr. John A. McEwan.

About TAG® (Technology Advancement Group®, Inc.)

TAG is a Veteran-Owned Small Business (VOSB) that has served as a leading provider of Information Technology (IT) solutions to the Federal Government and to the commercial sector for almost thirty years. TAG provides mission critical systems and services to resolve its customers' challenges by delivering industry-leading rugged hardware manufacturing and integration, tactical systems engineering, information technology services and staffing solutions, global communication network services, and world-class 24x7 customer service. **Service MattersSM. For more information, visit TAG.com.**

About AFCEA International

AFCEA International, established in 1946, is a non-profit membership association serving the military, government, industry, and academia as an ethical forum for advancing professional knowledge and relationships in the fields of communications, information technology, intelligence, and global security. **For more information, go to www.afcea.org.**

About U.S. Naval Institute

The U.S. Naval Institute is a non-profit, independent forum advocating the necessity of global sea power for national security and economic prosperity. Its publications, conferences and heritage resources help military and civilians understand the role each plays in safeguarding national security – and our obligation to the all-volunteer force who provide it. **For more information, go to www.navalinstitute.org.**
